FABRICA DE ESCAPOTES Y ACCESORIOS  
Ctra. Villavieja, s/n. 48940 BILBAO (VIZCAYA)  
15200 2011 (REV. 01)

APROVED BY MANAGEMENT

AMC S.A. Management develops its business lines in order to always place the company technologically in an advanced position, making the necessary investments and keeping managers and employees fully involved, and also to achieve compliance with the commitments of this Environmental Policy. Since 2003 the company has certified its Environmental Management System according to the UNE-EN-ISO 14001 standard, for the manufacture of iron and aluminum cylinder heads, manifolds, cylinder head components (guides, valves, pre-combustion chambers and caps of camshafts), hpdc of automotive components, brass clamps and battery terminals.

The main target of the company is to consolidate the leadership in the production and supply of automotive spare parts at competitive prices and in outstanding conditions of safety and reliability in their use, developing an optimal production system, based on respect for the environment and the preservation of the natural environment. The growth of AMC, S.A. must be sustainable, in order to take care of our neighbors' future and ours.

**AMC, S.A.** publicly declares the following commitments:

1. Our Corporate Policy established in 1993 continues to be fully valid, based on the premises of offering our products and services to fully meet the needs and expectations of our Clients, at highly competitive prices and in the agreed delivery times, optimizing the Human, technical and financial available resources, as well as optimization in the use of necessary raw materials.
2. Comply with the applicable legal requirements and other requirements applicable to our products.
3. The commitment to continuous improvement in environmental issues, focusing on the progressive reduction of depleted drilling agents and the optimization of the generated waste materials' segregation, thus favoring its recovery, valorization and recycling.
4. The commitment for the environment protection and prevention of pollution and the maintenance of a good environmental management culture will be evidenced in:
  - Contemplate in our R & D activities the introduction of new technologies with the minimum environmental impact.
  - Select the most ecological resins available, when economically viable.
  - Define manufacturing processes considering their implicit environmental aspects.
  - Influence our suppliers and contractors to reduce their environmental impacts in their actions with AMC.
  - Internally train staff on related to good environmental practices issues.
  - Collaborate with the different Public Administrations in environmental matters.
  - Improve the environmental performance of our Environmental Management System in order to achieve compliance with environmental objectives.

Amadeo Martí Ogayar, President and CEO of the company, will personally lead this Environmental Policy to be developed and extended to the entire company and all interested parties.
